

EnSave Consultancy and Training Pvt Ltd

Company Profile

EnSave Consultancy and Training Pvt Ltd was established under Companies Act, 2013 in the year 2015 at Chennai (India) by a consortium of Energy Management, Environment Management and Green Productivity Experts who have more than 25 years' experience in India and abroad. We are rendering our services with a team of experienced BEE (Bureau of energy efficiency, Govt. of India), accredited Energy Auditors, certified energy auditors, electrical and mechanical engineers. We work as per various industrial standards by using latest energy audit instruments. We have developed expertise for improving energy efficiency in all type of process and engineering industries and commercial buildings.

We provide consulting service through Detailed Energy audit covering both electrical and thermal energy audit to reduce your electrical and fuel consumption and cost. We also provide Water audit, Carbon Foot-Print, Cleaner Production, Green Productivity, Power Quality Analysis and Performance measurement services to industries & commercial buildings. We pursue a continuous endeavour of providing quality service. We cater to manufacturing industries like thermal power plant, steel, foundry, cement, paper, sugar, refinery, chemical, fertiliser, railways, textile, pharmaceutical and service sector units like hotel, hospital, IT sector, retail shops, banks, educational institute, data centre and residential building and more.

We conduct Technical Training for plant supervisors, managers and executives on energy efficiency and energy management. Training program can be customised to meet the specific requirements of industry. We have developed two modules on all energy management subjects namely O&M level (to operators & supervisors) and Management level (to managers & executives).

We conduct staff training typically in the following three levels:

- Management Development
- Engineering and Technical
- Supervisors and Operators.

We organise and conduct the following three type of training:

- In-house Training
- Workshop Training and study Tour
- Overseas Training

Our primary focus of training is transferring knowledge, skills and best practices in the field of energy efficiency and conservation.

Our Vision

- To excel in providing cost effective & innovative solutions for enhancing energy efficiency and cost reduction.

Our Mission

- To exceed the client's expectations & demands by providing our best technical resources.
- To create awareness of energy efficiency and energy conservation role in mitigating climate change.

Our Objective

"Energy efficiency" is proven economic drivers that can help industry to reducing their energy waste while reduce 'Greenhouse Gas' emissions. Energy cost reduction is the need of the hour, for each and every Industry, to meet the increasing global competition. Energy cost on account of Electricity, Fuel oil, Coal, Gas, Water and Steam is an area where very effective & quick results can be achieved by energy auditing.

Our energy audit experiences shows that there is considerable untapped energy saving potential up to 25% of total consumption of commercial energy use in industrial & commercial sector, even in very well managed organisation. Realizations of energy saving will depend upon identification and the successful implementation of various energy saving projects. Our services results in saving of electricity and fossil fuel which in turn provides monetary saving and reduce pollution.

Our Strengths

- Accredited Energy Auditor and certified energy auditor professionals
- Energy Audit Instruments to conduct energy Audit
- Our recommendation and solutions are practical, implementable and cost economics.
- Quick & Quality services
- In hose training to Operators & supervisors (O&M level) and Managers & Executives (Management Level)

Our services and expertise

- Detailed Energy Audit
- Electrical energy Audit
- Thermal Energy audit
- Building Energy Audit
- Water audit
- Green Productivity
- Power Quality Analysis
- Waste heat recovery
- Carbon Foot Print study
- Environment Management
- ISO 50001 EnMS Implementation
- PAT&Monitoring and Verification
- In-house Technical Training
